

Shraddha Gourishetty

GIS & Geospatial Analyst

Ontario · +1 (548) 333-1611 · shraddhagourishetty@gmail.com · [Portfolio](#) · [LinkedIn](#) · [GitHub](#)

TECHNICAL SKILLS

Esri Platform: ArcGIS Pro, ArcGIS Online, ArcGIS Enterprise, Portal, ArcMap

Programming: Python (ArcPy, Pandas, NumPy, Scikit-Learn, GeoPandas), SQL, R, JS

Photogrammetry: DJI Terra — GCPs, orthomosaic, DSM/DTM (Transport Canada Drone Cert)

Field & Mobile: Field Maps, Survey123, QuickCapture, GNSS data collection

Web GIS: Experience Builder, Dashboards, StoryMaps, Instant Apps, Web Maps

Remote Sensing: Google Earth Engine, LiDAR fundamentals, raster analysis, land cover classification

CAD & 3D: AutoCAD Map 3D, 3D scene visualization, terrain & surface modelling

Data Management: Geodatabase QA/QC, ETL, metadata, spatial data standards, PostgreSQL/PostGIS

EXPERIENCE

GIS Business Analyst · Korotu Technology · Toronto, ON

Jan – Aug 2024

- Ran end-to-end drone photogrammetry workflows in DJI Terra, GCPs, orthomosaic, DSM/DTM and integrated into ArcGIS pipelines
- Built Python-automated spatial data pipelines consolidating 5+ environmental datasets, cutting processing time 30%
- Produced 15+ cartographic map outputs supporting \$150K–\$200K in awarded climate funding applications

GIS Analyst · Region of Peel · Mississauga, ON

May – Aug 2023

- Spatial epidemiology analysis on 10+ years of surveillance data across 3 municipalities for 1.5M residents
- Built predictive disease prevalence models integrating environmental, demographic, and land-use datasets using GIS and R

Data & Analytics Technician · Regional Municipality of York · Newmarket, ON

Sep – Dec 2022

- Built custom ArcPy toolbox automating enterprise geodatabase QA/QC, reduced processing time ~40% across 9 municipalities
- Published and maintained 10+ ArcGIS Enterprise services; developed interactive web map using JavaScript and ArcGIS Online

SELECTED PROJECTS

Downtown Toronto Traffic Intelligence & Risk Prediction

GIS and machine learning workflow analyzing congestion, collision patterns, and transportation risk across Downtown Toronto.

- Built spatial risk models using Toronto Open Data and 500m grid aggregation; applied ML clustering to identify high-risk traffic zones
- Performed spatial joins, normalization, and feature engineering using ArcGIS Pro, QGIS, and Python
- Designed professional cartographic layouts and an interactive ArcGIS StoryMap for technical and non-technical audiences

Land Cover & Soil Moisture Analysis - Sudan-Sahel

Assessed regional environmental risk in Sudan-Sahel using satellite data and climate analysis

- Processed 100+ satellite scenes through automated Google Earth Engine + Python pipelines to assess desertification risk
- Integrated multi-temporal land cover and climate variables into reproducible raster analysis workflows

Wildfire Risk Classification Model - Mackenzie County, AB

Developed machine learning solution for emergency planning in Mackenzie County, Alberta.

- Random Forest classifier at 96% accuracy combining vegetation, terrain, and weather spatial datasets via structured ETL workflows
- Produced tiered risk zone maps (Low to Extreme) for non-technical emergency planning stakeholders

EDUCATION

Bachelor of Environmental Studies, Geomatics (Honours) · University of Waterloo · Waterloo, ON

Sep 2020 – Jun 2025

Specialization in Aviation · Minor in Computing

CERTIFICATIONS

Transport Canada Basic Drone Pilot Certificate · AutoCAD Map 3D Essential Training · Google Data Analytics Professional Certificate · ESRI MOOC - Modern Geo Apps
